PROFILE

Dedicated and motivated third-year Cybersecurity undergraduate with a strong foundation in information security principles and emerging technologies. Committed to apply academic knowledge in practical environments while continuously developing technical, analytical, and problem solving skills. Demonstrates strong communication, teamwork, and adaptability through active participation in collaborative projects and learning initiatives.

PROJECTS

Web-Based Dental Management System

[JULY 2025 – OCTOBER 2025]

Technologies and Tools: Java (Spring Boot), SQL Server Management Studio, IntelliJ IDEA, HTML, CSS, JavaScript

- Engineered a web-based platform to manage patient records, appointments, and clinic operations, supporting 100+ patient profiles
- Implemented automated appointment scheduling and data management features, improving administrative workflow efficiency by 30%
- Designed and integrated a relational database using SQL Server to ensure secure, reliable storage of patient data

Loan Prediction System

[AUGUST 2025 – NOVEMBER 2025]

Technology and Tools: Python, TensorFlow, Pandas, Google Colab, Scikit-learn, Matplotlib

- Developed a machine learning model to predict loan approval status based on applicant financial data, achieving 85%+ prediction accuracy
- Performed data preprocessing, feature engineering, and model evaluation using Scikit-learn and Pandas to improve decision-making reliability
- Visualized model performance and key financial indicators using Matplotlib to support data-driven insights

Online Appointment Scheduling System

[FEBRUARY 2025 – MAY 2025]

Technologies and Tools: Java (Spring Boot), IntelliJ IDEA, HTML, CSS, JavaScript

- Built a web-based appointment scheduling system using Java and object-oriented programming (OOP) principles to manage users, bookings, and time slots
- Implemented CRUD operations and file handling to support efficient appointment data storage and retrieval
- Designed custom data structures (Linked List) to optimize booking management and reduce data redundancy

Water Tank Monitoring System

[JULY 2024 – OCTOBER 2024]

Technology and Tools: Arduino, Embedded C, Bluetooth Module (HC-05), Mobile Application, Arduino IDE

- Developed an Arduino-based home automation system to control lights and electrical devices via Bluetooth-enabled mobile application
 - Implemented real-time monitoring and control features, improving energy efficiency and user convenience
 - Programmed embedded firmware in C to manage hardware communication between Arduino and mobile interface
-

EDUCATION

Undergraduate B.Sc. (Hons) in Information Technology Specializing in
Cyber Security - Sri Lanka Institute of Information Technology (SLIIT).

2024 - Present

G.C.E A/L Kegalle girl's college.

2021 - 2023

G.C.E O/L Kegalle girl's college

2020

SKILLS

Technical skills

Java | C | Python | HTML | JavaScript | CSS | SQL | R | AI | OOP

Soft skills

Teamwork | Time Management | Problem solving | Adaptability | Flexibility | Multitasking

CERTIFICATIONS

- 2025 Certificate in python Centre for Open & Distance Learning (CODL) – University of Moratuwa
- Cisco Network Academy Introduction to Cybersecurity | June 2026

Gained foundational knowledge of cybersecurity principles, cyber threats, network security, and security best practices.
