PROFILE

Third-year Cybersecurity undergraduate with a foundation in information security, networking, and web application security. Developing practical skills through cybersecurity labs, TryHackMe, Hack The Box, and university projects.

PROJECTS

Cybersecurity Projects & Practical Labs

- Hands-on practice with Kali Linux, Nmap, Wireshark, Docker, and VirtualBox.
- Practiced network scanning, reconnaissance, TCP/IP networking, vulnerability assessment, and web security.
- Worked with Metasploitable 2 and OWASP Broken Web Apps in isolated lab environments.
- Currently practicing cybersecurity through TryHackMe and Hack The Box.
- Currently developing practical skills in penetration testing, network security, and DevSecOps.

Blackgate CTF – Cybersecurity Challenge Platform **[AUGUST 2026 -OCTOBER 2026]**

Technologies: Python, Flask, Docker, HTML, CSS

- Developed and tested a multi-stage Capture The Flag (CTF) platform with challenges covering different cybersecurity concepts.
- Performed functional testing and flag validation to verify challenge functionality and correct flag submission.
- Used Docker to support the deployment and execution of the CTF environment.
- Documented implementation details and testing results.

Building and Securing a DevSecOps Pipeline **[AUGUST 2026 -SEPTEMBER 2026]**

Technologies: Docker, Docker Compose, GitHub Actions, Semgrep, npm audit, Gitleaks, Trivy

- Implemented a DevSecOps pipeline for OWASP Juice Shop with automated security checks.
- Identified, remediated, and retested four web application vulnerabilities, including SQL injection, IDOR, and XSS.
- Integrated SAST, dependency analysis, secrets scanning, and container vulnerability scanning into GitHub Actions.
- Applied STRIDE threat modelling and documented security testing results.

Web-Based Dental Management System **[JULY 2025 – OCTOBER 2025]**

Technologies and Tools: Java (Spring Boot), SQL Server Management Studio, IntelliJ IDEA, HTML, CSS, JavaScript
Developed a web-based system for patient records, appointments, and clinic operations.
Designed a relational SQL Server database for reliable and secure data management.

Loan Prediction System **[AUGUST 2025 – NOVEMBER 2025]**

Technology and Tools: Python, TensorFlow, Pandas, Google Colab, Scikit-learn, Matplotlib

- Developed a machine learning model to predict loan approval status with 85%+ accuracy.
- Performed data preprocessing, feature engineering, and model evaluation.

EDUCATION

Undergraduate B.Sc. (Hons) in Information Technology - Cyber Security
Sri Lanka Institute of Information Technology (SLIIT). **2024 - Present**

G.C.E A/L - Physical Stream
Kegalu Balika Vidyalaya. **2021 - 2023**

SKILLS

Technical skills
Cybersecurity: Security Fundamentals | Network Security | Web Application Security | Basic Penetration Testing
Tools: Kali Linux | Nmap | Wireshark | Docker | VirtualBox
Java | C | Python | HTML | JavaScript | CSS | SQL | R | AI | OOP

Soft skills
Teamwork | Time Management | Problem solving | Adaptability | Flexibility | Multitasking

---

CERTIFICATIONS

- 2025 Certificate in python Centre for Open & Distance Learning (CODL) – University of Moratuwa
- Cisco Network Academy Introduction to Cybersecurity | June 2026
- ISC2 Certified in Cybersecurity (CC) – Currently Preparing
